

FREE WEBINAR FOR HR SPECIALISTS

REVIEWING **REWARD** AND **BENEFITS** STRATEGIES FOR 2023

Hays are delighted to invite you to the latest in our series of HR Insights webinars, this time reviewing reward and benefits for challenging times.

2022 has presented individuals and employers with an unprecedented combination of demands and challenges as a result of a number of major economic and geopolitical shocks. As these challenges look set to continue well into 2023, employers will need to meet the challenge of balancing organisational financial performance with support and wellbeing for their employees. Pay, benefits and reward packages will need to be assessed and potentially recalculated to reflect the needs of their employees when it comes to cost of living and financial wellbeing, especially considering unemployment is set to remain below 6% for the next 18 months.

As we head into a new year, the need for regular evaluation and an agile response delivery is likely to stay a high priority for many employers. With this in mind, join Hays and an expert panel of contributors as we take a closer look at some of the major considerations informing employer Reward and Benefits policies including:

- The impact of a full employment and skills market on base line salaries and benefits packages.
- The impact of the cost of living crisis on employee wellbeing and how employers are practically responding to this in the short, medium and long term
- What is in and what is out when it comes to general and customised employee benefits in 2023 and beyond
- The COP effect – How to implement sustainability options within your benefits offering
- Improving employee access and engagement with benefits

We look forward to having you join us. **Please click here to RSVP your attendance.**
